THE SIGNAGE COMPANY

Acoustic Panels

Artwork preparation guide

1. Set up your file

Supply a PDF at 100% of the finished panel size in millimetres.
Use CMYK colour, convert fonts to outlines and embed all images.
Use bitmap images at 130dpi or higher at full size.
Export without trim, crop or registration marks.

2. Match the selected option

Choose the same finished size, thickness, print and cutting option as your order. Standard Cutting is a square or rectangle.
For double sided printing, clearly identify the front and back artwork.

3. Prepare a custom contour cutline

Place a clean vector outline on a separate layer.
Save the outline as a spot colour named exactly: cut
Keep the cutline separate from your printed design.
The cut shape must fit within the selected panel dimensions.

4. Standard panel sizes

350 x 350mm | 600 x 300mm | 600 x 600mm
900 x 600mm | 1200 x 900mm
Available thicknesses: 12mm and 24mm.
